No alterations or variables in the terms of the contract shall be valid or binding upon the City unless made in writing and signed by the City.

No such claim will be considered unless so made.
37. **GUARANTEE** All guarantees and warranties required shall be furnished by the Contractor and shall be delivered to the Project Manager (e.g. other required documents, operating manuals, maintenance manuals/schedules, etc.) before final payment is made.

The Contractor guarantees that the items conform to the design and specifications and to drawings, samples or other descriptions referred to in this document. The City shall have the right to take such steps as it deems necessary to determine the ability of the Bidder to perform the work and reserves the right to request additional information. The right is reserved to reject any bid where an investigation of the evidence or information submitted by such Bidder does not satisfy the City that the Bidder is qualified to properly carry out the terms of the Bid Document.

11. EXISTING CONDITIONS

The City's Water Treatment Plant currently produces sludge residues from its treatment process of Potomac River water in the form of pressed "cake" and sometimes "thickened" liquid. Sludge is pressed utilizing a plate and frame press installed on the second floor of the Solids Dewatering Building.

It is estimated that the Water Treatment Plant will generate approximately one thousand (1,600) tons of pressed sludge per year.

During times when there may be equipment or operational problems, there may be the need to haul liquid sludge. If such an emergency (unscheduled service) event occurs, the City will inform the Contractor of the circumstance and necessitate immediate corrective action. The Contractor must have the capability to haul liquid sludge when necessary on short notice. Sludge hauling containers are loaded by sludge dropping from the press and into the open top container which is positioned on the first floor under the press. The press is operated at various times on a seven-day per week basis as needed. There is no set time in which sludge is generated and weights of loads vary (averaging 15 tons per container). There is no on-site container weighing equipment.

12. SLUDGE CHARACTERISTICS

The content of the sludge generally varies between 35% to 50% solids for the pressed sludge, and 5-10% solids for the liquid sludge.

13. SLUDGE CONTAINER REQUIREMENTS

Type and Positioning. For the purpose of these specifications, a sludge container is described as an open top “roll off” dumpster type of container. Containers shall meet all federal, state, county and city health and safety regulations. Containers shall be positioned in the loading area under the press by the Contractor, under the direction of Water Treatment Plant staff, without damage to any portion of the Solids Dewatering Building or its equipment.

Container Capacity and Loading. Sludge containers shall have the capacity to haul thirty (30) cubic yards of cake sludge. The City shall be liable for a minimum payment of ten tons (10 tons) of cake sludge, per load. Containers shall be clean and free of residual materials from previous hauling. If a trailer contains materials such that the effective capacity will be reduced, the Contractor shall remove and clean the trailer at his own expense prior to returning it to the Water Treatment Plant for filling. The Plant staff will load containers as evenly as possible, but it shall be the Contractor’s responsibility to supply any labor and/or equipment necessary to redistribute the load within the vehicle to meet DOT axle weight requirements or for any other reason. There shall be no covering, splash shield or other device on or over the top of the container which would otherwise cause any sludge cakes, or portions thereof, to be deflected onto the floor of the building. The distance from the loading area floor to the lowermost portion of the sludge deflector chute is one-hundred-twenty-five inches (125 inches). Minimum width of the container shall be ninety inches (90 inches). The overall length of the container shall not exceed two-hundred-seventy-six (276) inches.

Bidder shall provide a list of all sludge hauling trucks, trailers with manufacturer’s, year, model, type, trailer capacity, trailer empty weight to be used by the Contractor for the contract.

14. CITY FACILITY

The City shall make no modifications to the Solids Dewatering Building or any equipment contained therein in order to accommodate the Contractor. Any modifications, improvements or equipment required shall be upon approval by the City, and at the sole expense of the Contractor. Containers shall not leak any fluids or oils onto the loading area floor and shall be of sturdy construction.

17. REMOVAL OF LOADED CONTAINERS

Notification of Removal. Upon the determination by Water Treatment Plant staff that the current container is loaded to a capacity requiring its removal to the disposal site, the Superintendent, or their delegate shall contact the Contractor to have the full container removed and an empty one positioned in its place in the loading area.

The Contractor shall maintain a telephone number for the purpose of notification by the City (24) hours a day, 7 days a week. In the event that a message is placed in the Contractor’s voice mail or on the Contractor’s answering machine, the Contractor shall acknowledge the call within two hours (2) hours.

Twenty-Four (24) Hour Response Time. Upon notification, the Contractor shall transport an empty container to the Water Treatment Plant within twenty-four (24) hours of such notification, remove the full container from the loading area and position an empty container in place under the press. The full container shall then be immediately

removed from the site. There is no suitable on-site location for the storage of an additional hauling vehicle by the Contractor.

Transport. The Contractor shall take extreme care to avoid spills during the sludge transportation. The Contractor shall be responsible for the cleanup and removal of any spilled material during the removal and disposal operation. Any spillage, accidental or otherwise which occurs at/or off the Water Treatment Plant site shall be the responsibility of the Contractor to completely remove and report to the proper agencies and the City in a timely manner. The City assumes no liability for damage which may occur as a result of spills. Any spills, moving violations or other citations are the responsibility of the Contractor.

18. DISPOSAL

Sludge must be disposed of in accordance with all federal, state and local laws and regulations.

Sludge Destination and Disposition. Prior to commencing the hauling of sludge from the Water Treatment Plant, the Contractor shall provide the City with the name, location and operator of the proposed disposal site. The Contractor shall supply copies of all permits pertaining to the hauling of sludge and those of the receiving facility which shall show that all Federal and State requirements are being adhered to.

The Contractor shall be responsible for safely unloading sludge at the authorized disposal site. The Contractor shall comply with all the requirements stipulated by disposal site personnel in the unloading of the sludge.

19. PERMITS, REGISTRATIONS AND RECEIPTS

Weight Ticket Copies. The Contractor shall supply the City with copies of weight tickets, issued by a certified weighing facility, for all loads removed from the Water Treatment Plant which are to be billed to the City for payment. The copy(s) of the weight ticket(s) shall be attached to the invoice before forwarding to the City for payment.

Hauling Receipt. The weight of the removed sludge material from the work site shall be verified for each truckload removed. The Contractor shall weigh each truck before and after loading. The Contractor shall provide a hauling receipt which will include the date, truck/trailer number, disposal destination, empty and full weights, weight of sludge hauled, driver's signature and Water Treatment Plant staff's signature and shall be submitted for each load removed. Truck scales shall be certified by the State of Maryland and the weights recorded in pounds.

Permits. It is the responsibility of the Contractor to obtain all the necessary permits required for the removal and disposal of sludge.

Certificate of Registration. Contractor will be required to provide the required Certificate of Registration for soil conditioners from the Maryland Department of Agriculture, State Chemist Section after award. Please contact the Maryland Department of Agriculture, State Chemist Section, phone (410) 841-2721, or visit their website: http://mda.maryland.gov/plants-pests/Pages/state_chemist.aspx for further information.

20. WORKING HOURS

The sludge shall be loaded into the Contractor's trailer by City personnel on a (24) hour basis, 7 days a week. The Contractor shall be capable of providing tractor units and driver to remove the loaded trailer from the site on an on call basis. Removal of sludge shall take place during daylight hours and at a predetermined time mutually agreed upon by both the Contract and the Water Treatment Plant Superintendent.
